快速磁性座虎鉗 QUICK MAGNETIC JAW VISE

 $Feature: \bullet \ \ \text{Magnetic base is designed for prostioning the vise on the working table accuractely \& promptly}$

- The Optional position set can help to position work piece promptly & to process the repeated work very accurately
 Suitable for clamping work piece on drill press machine or millling machine
- Quick motion machanism design makes clamping and releasing work piece promptly by sweveling the reversing lever.
- ullet Slide bar design makes work piece is firmly fixed by jaw pair without any inclined situation of the jaws
- \bullet Designed with solid strucure, main body is made of FC15, assemble a pair of heat treated steel jaws with hardness HRc 45° $\sim 50^{\circ}$
- $\bullet\,$ Jaw pair and handle are surface treated by black oxide finish
- Front fixed prismatic jaw with cross V-grooves is designed for clamping work piece firmly in both vertical & horizontal directions.
 For 103M-4G:

All sliding suraces of each part, base face & jaw pair are grinded for assuring the flatness as well as the verticalness are controlled in 0.05/100 mm accuracy. Electrical applied: 100-240 volt AC, CE approval certificate no. 194613

Unit: mm
